13. A method of purifying kallikrein from a mixture which comprises providing the protein of claim 4 in insolubilized form, and contacting the mixture with said insolubilized protein or analogue so that kallikrein in the mixture is bound. --

#### REMARKS

The above amendments to the claims are being made in order to eliminate multiple dependency for the purpose of reducing the filing fee. The multiply dependent claims have each been replaced by several singly-dependent claims. Please enter this amendment prior to calculation of the filing fee in this case.

Applicants have added into the present specification a new paper copy Sequence Listing section according to 37 C.F.R. §1.821(c) as new pages 44-68, and have renumbered pages 44-48 as new page numbers 69-73. Furthermore, attached hereto is a 5 1/4" floppy disk containing the "Sequence Listing" in computer readable form in accordance with 37 C.F.R. §1.821(e).

The following statement is provided to meet the requirements of 37 C.F.R. §1.821(f), and 1.821(g).

I hereby state that the content of the attached paper and computer readable copies of the sequence listing, submitted in accordance with 37 C.F.R. §1.821(c) and (e), respectively, are believed to be the same.

I hereby also state, in accordance with 37 C.F.R. §1.821(g), that the submission is not believed to include new matter.

In re of PCT/US95/00299  
Inventors: William MARKLAND et al.

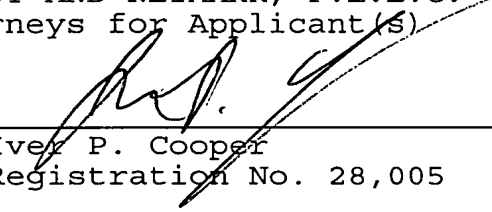

Accordingly, applicants submit that the present application contains patentable subject matter and therefore urge the examiner to pass the case to issuance.

If the examiner has any questions or comments concerning the above described application, the examiner is urged to contact the undersigned at the phone number below.

Respectfully submitted,
